

CORE SERVICES

INTUITIVE, INTELLIGENT AND DIVERSE TRAINING SOLUTIONS

Technology-Based Training — Interactive Electronic Technical Manuals — Electronic Performance Support Systems

Interactive Electronic Technical Manuals (IETM)

DPA is a leader in the development and deployment of Interactive Electronic Technical Manuals and Performance Support Systems for the NAVY, USMC and ARMY. IETM offer easy access to technical information and manuals enhancing productivity through reduction of time spent on research. IETM and PSS are developed utilizing cutting edge technology, high-end graphics, 3-D animations, and video and simulation technologies in a user friendly environment. Essential performance knowledge and skill is enhanced through just-in-time (JIT) training embedded in the programs. Refresher training is deployed in real time to assist with specific critical operations, allowing the operators and maintainers to maximize time and increase quality performance. With deployment via the web, IETMS and PSS have been delivered via PDA and other web-enabled devices. The portability and convenience of IETM and PSS maximize time value and bring a high level of support to the user.

Web-Based Training (WBT) / Distributed Learning (DL)

DPA is a leader in Web-Based Training (WBT) and Distributed Learning (DL) development for the NAVY, USMC, Government and Commercial vendors. DPA has produced multiple systems of WBT for military, educational and government environments. Interactive courseware has been deployed world wide 24/7 establishing the most flexible training programs possible. Students are able to utilize training courseware from any global position with web access. WBT has been delivered via PC, laptop and PDA. Courseware incorporates a variety of multimedia products, including 3-D, video, animations and simulations. Training programs are flexible in design to accommodate specific objectives for each student. Full LMS can be integrated with the WBT products, establishing a turn-key training solution. Web delivery allows for real-time upgrades, revision and maintenance deployed universally.

CORE SERVICES

MILITARY, GOVERNMENT AND COMMERCIAL CLIENTS

Computer Based Training (CBT)

DPA is a leader in Computer Based Training (CBT) development for the NAVY and USMC rotary and fixed-wing aircraft systems. DPA has produced over 3,000 hours of CBT for operators and maintainers of over 15 different major aircraft systems. DPA was among the first to receive SCORM certification and we continue to lead the industry in the production of SCORM 2004 conformant courseware. DPA's courseware has ranged in complexity from Level 1 to Level 4 interactivity and incorporates simulations, desktop simulation devices and intelligent tutors, maximizing value with 3-D imaging and animations. Additional government programs have been developed for Departments of Justice and Labor. Commercial efforts include a variety of interactive, self-paced programs supporting financial, pharmaceutical and travel industries. CBT provides the training environment with a cost-effective solution to meet significant training requirements. Self-paced courseware prepares the learner through flexible interactive training available 24/7. Testing, remediation and full LMS capabilities can be built into the system for a comprehensive turn-key solution.

Instructional Systems Development (ISD)

DPA is a leader in Instructional Systems Development (ISD) for the NAVY and USMC. DPA provides comprehensive analysis, design, development, implementation and evaluation services for any training environment. Every stage of instructional design is performed utilizing cutting edge software and media to maximize the training experience while maintaining instructional effectiveness. DPA's customers include DoD, OSHA, IRS, FBI and numerous commercial entities, including multiple divisions of L-3. Every system sold to a customer requires some measure of instruction or training. DPA was acquired by L-3 for the purpose of providing training.

D.P. Associates Inc.

L-3. Headquartered in New York City, L-3 Communications employs over 64,000 people worldwide and is a prime contractor in aircraft modernization and maintenance, C3ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems and government services. L-3 is also a leading provider of high technology products, subsystems and systems. The company reported 2007 sales of \$14 billion.
