

gForce ELEPHANT BETA TRAINING SIMULATOR

Deicing is a difficult task. However, it can be made more efficient by learning the intricacies of the equipment and the contaminant removal process before ever getting into the deicer.

The gForce Elephant Beta Training Simulator replicates the experience of using one of the world's most popular and sophisticated deicing vehicles. Hands-on experience with actual Elephant Beta controls ensures skill development and familiarity before you even step inside a real truck.

gForce's physics-based development approach lends a real-time response to driving the truck along side the aircraft and spraying to remove snow and ice. Our competitive advantage lies in engineering the effects of fluid composition and contaminant properties on the aircraft surface with the interaction of deicer spraying.

Our system uses the actual controls from the Elephant Beta truck and our virtual touch screen panel puts all the scenario controls at your fingertips.

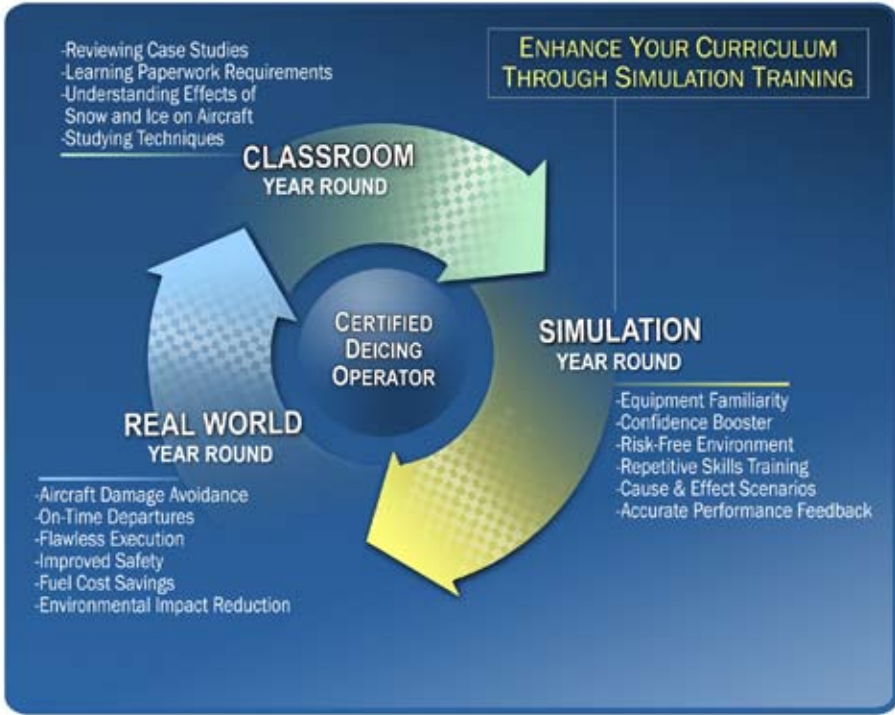

BETTER TRAINED DEICERS LEAD TO BETTER RESULTS...

- | | | |
|--------------------------------|---|------------------------------|
| online training | → | consistent training method |
| initial and recurrent training | → | learning curve reduction |
| accurate record-keeping | → | successful audits |
| safety improvements | → | damage reduction on the ramp |

gForce ELEPHANT BETA TRAINING SIMULATOR

Our customers enjoy the best of both worlds because gForce simulators are backed by the resources of a world leading organization – L-3 – an industry leader of training, simulations and government services.

Benefit from our ability to improvise, adapt and overcome the challenges you face to increase the training and safety awareness of your ramp operations team.

Please contact us for pricing and leasing availability.

L-3. Headquartered in New York City, L-3 Communications employs over 64,000 people worldwide and is a prime contractor in aircraft modernization and maintenance, C3ISR (Command, Control, Communications, Intelligence, Surveillance and Reconnaissance) systems and government services. L-3 is also a leading provider of high technology products, subsystems and systems. The company reported 2007 sales of \$14 billion.
