

# **Crisis ThinClient: Using Scalable Technology to Effectively Implement Incident Response Plans**

## **OVERVIEW**

Crisis ThinClient is the first Critical Information Management System (CIMS) software developed from the ground up for secure access by mobile clients. Our secure web-based interface and mobile device access means that your first responders and critical support staff are instantly able to deploy incident response plans from any location at any time with no costly training or certification requirements.

MPRI created Crisis ThinClient based on feedback from emergency managers on the federal, state and local levels. These conversations highlighted a need for an easy to use web-based incident response tool. Expanding on our solid experience developing the first generation Crisis solution, Crisis ThinClient was created to incorporate secure web-based interface, mobile device access, and instant emergency deployment into an interface that requires no training for the user to be immediately effective. The fully automated backup function insures that complete incident response plans will be available on demand.

## **HISTORY**

CRISIS was first developed as a hardware-based solution to manage critical information and incident response plans. As the complexity of incident response plans grew to meet expanded demands on the federal, state and local levels, it became imperative that first responders and critical support staff be able to react quickly and communicate effectively with each other, ensuring public safety. MPRI leveraged newly emerging technologies for software deployment, communication and data storage to produce CRISIS ThinClient as the next step in the CIMS product evolution.

## **INFORMATION**

Crisis ThinClient requires no supporting hardware or software installation. All information is stored on secure servers. CRISIS ThinClient is OASIS and W3C standards compliant and is compatible with Internet browsers for Windows, Mac and LINUX operating systems. Information can be exchanged between computer, PDA and mobile phone devices.

## **FURTHER INQUIRIES**

Further detailed information on CRISIS ThinClient is available upon request. Please call 800.634.2874 or send e-mail to [mpri.crisis@L-3com.com](mailto:mpri.crisis@L-3com.com).
